**(A) NOT FLAGGED**

Is the reliability difference between enhancing tumor and the peritumoral context region close, moderate, or wide?

Reference: close gap

Prediction: close gap

Raw 0.79 → Post-hoc 0.96 → Q-CUR 0.99

(B) REVIEW FLAGGED

Are necrotic or non-enhancing tumor core and enhancing tumor too close to separate confidently here?

Reference: distinct

Prediction: ambiguous

Raw 0.44 → Post-hoc 0.50 → Q-CUR 0.07
